

**AUTHORIZATION TO TURN ON WATER WITHOUT  
OWNER/TENANT PRESENT**

The undersigned as owner/tenant of the residence located at \_\_\_\_\_, Eufaula, Barbour County, Alabama, does hereby request the Water Works and Sewer Board of the City of Eufaula to turn on water service to said residence without requiring the owner/tenant to be physically present at the moment said water service is turned on. The undersigned has been advised that there are certain risks involved in having said water service turned on without someone being physically present in the house to ascertain that all faucets are adequately closed. In the event that there are faucets in "open" position or other open sources of water which have not been cut off prior to said water supply being turned on, substantial damage could occur to property and personal effects of the owner/tenant as a result of said water supply being turned on without the owner/tenant being physically present. In order to accommodate the owner/tenant does hereby release the Water Works and Sewer Board of the City of Eufaula and its agents and employees from any kind and nature that may result from the turning on of said water supply. The undersigned owner/tenant does further indemnify and agree to hold the Water Works and Sewer Board of the City of Eufaula harmless from any and all adverse consequences and claims of themselves and of any other party who may be injured, have property that is injured as a result of said water being turned on without the said owner/tenant being physically present to secure said premises.

The owner/tenant further acknowledges that if open sources of water are left on, the service will not be reconnected, and the meter will remain locked. This will result in additional trip charges (\$10 during normal business hours/\$50 afterhours) assessed to owner/tenant's account at the time a repeat trip is made. Additionally, the curb-stop is property of the Water Works and Sewer Board of the City of Eufaula and may not be used by owner/tenant to turn their service "on" or "off". If damage to the curb-stop is ascertained as a result of unauthorized use, a minimum charge of \$100 may be assessed to owner/tenant's account.

If owner/tenant is in possession of a wheel valve (customer side cut-off), it may be used by the owner/tenant turning in the "off" position prior to the Water Works and Sewer Board of the City of Eufaula turning on water service to prevent an open source of water.
